Namaste,

Things getting easier by the day hopefully....

1) A Wiki means fast...it is used in the site now.. like this.... by adding word....like this [y>[O inrestant]y create a Page in the new improved Wiki it is like something that all can edit also.....yet main point for us..is this what you write in either and Article or forum post that needs more explain these in our own forum post or article often this distracts from said point keyword within the article..that you may have knowledge of, yet others d word by adding the brackets....That gives you a whole page in the Wiki t word...

So for instance [Dilkeo m h e b u l p e t o p g](#) is not what we want to do...

The reason we are adding this, and still more work to be done on our part that you can simply take the 13 dimensions, make a copy into the Wiki and means other can also...and so we can re-open the books when we get around all....aka Quran, Bible ect...as whole books in a Wiki anyone can edit or refine them and fix the missing translations....
