Ok load has changed and been edited, FireFox now runs faster....
Just `have a Script` is Included and then repeated for each Block used as a
the `Smarty` fills the data.

Allot of that has been explained possible by me, yet more is still possible.

The userbar now calls the other items within it for different user groups
my home server was loads faster (still `Smarty` and `Smarty` appears in a
`JavaScript` faster `HTML`

The `CSS` has all gaps removed (more or less as `needed` and `also` the
the contents to display it as quick as possible.

Will have to make list of some of these bits and some better guides on h

Also plan to make some themes like this site is now using where the site
content load speed.

Also added better `.htaccess` file to gzip the site and keep track of people
hopefully now all is fixed so much and still more..... people will stay

and make this place a home??

Decreased size again of all themes to `HTML` and `HTML` `CSS` including any items th
call the system `Smarty` blocks
