ok multimenu done now also w [S/V](#) did want to fix it to be 100% w3c and will...tried capture and failed it takes to long and more resources....the context...yet fair enough...lots of Snazzy menu's or face making one alone don't use many others might and so make it that it works for all is always

Anyways thats most of this site...think all...will check and get all odd b

Other thing is with this that Js load the theme so maybe a js system dump home server copy and here for ahile testing and there is no repeated dis file it just has it....so maybe [T.p](#) look over a style done....
