Now that's what I call wow wiz-and-a speed

Just done something that required my processor to actually test (if you k
many things you can do that won't test, yet this does always..... multipl
tasks also at the same time = (windows media 11 playing auto-play from
connections windows x2 and then opened a folder with 35 PHP files.....in
take quadruple the time, first it would start ok and then a slow end, now
the processor has speeded it's self up, it doesn't slow near the end of op

So glad called here wiz-and-a hope it make sense now....one frequency,
reality, lets sort it and figure out why our frequencies have dropped and
happier, if we then don't have to wait for the sense to feel like we shoul
