Some of the things not on as default in Firefox that make it work better a

`layout.spellcheckDefault`

Set this to 2, instead of 1 - as that makes it check any single line areas
of only multiline areas with 1, and 0 is off.

`gfx.webrender.all`

This makes it that the graphics card will process the graphics, rather tha

If you have a dual graphic system, also make sure to go into Windows Se
Settings - Graphics Performance Settings - then make Windows use the H
card for Firefox.
